Smaller businesses, organizations, and schools

AC people

147 employees form the AUTOCONT SK team. Most of them have years of experience in their field. We also employ a number of young people and students, who enrich the company with their enthusiasm and an unbiased look at today's IT.

AUTOCONT group has 420 certified specialists with 1,280 certification titles related to our key partner technologies, which they share for projects in Slovakia and the Czech Republic.

AC coverage

Bratislava, Košice, Žilina, Banská Bystrica,
Prešov, Trenčín, Martin

Praha, Brno, Ostrava, České Budějovice,
Olomouc, Jihlava, Plzeň, Karlovy Vary, Teplice,
Liberec, Pardubice, Hradec Králové (Smiřice),
Zlín, Žďár nad Sázavou

IT INFRASTRUCTURE

The scope of IT infrastructure is vast. It starts with cables buried underground and backup diesel generators to supply electric current in case of an outage, and continues with construction of economically efficient data centres with the possibility of using cloud computing technologies, designs of high-performance data storage areas and access networks, application and desktop virtualization, and implementation of directory services, email, and tools for effective company communication. Finally, there are systems for Asset Management, Service Desk and IT management and monitoring. Warranty and post-warranty services and subsequent services for IT support and operation are also very important. Not every customer needs and uses everything. It depends on the size of the company and its focus. However, the important thing is that whatever the company needs in this area, AUTOCONT can take care of it.

CYBER SECURITY

With the increasing digitization of business processes and ways of communicating in general, cyber security is becoming more and more important. We deal with the security of end-point devices, including mobile platforms, networks, internet or cloud connection, user identity protection and management, data leak and theft protection, application and data centre protection. We also implement Security Information and Event Management (SIEM).

OUTSOURCING IT

AUTOCONT offers outsourcing services ranging from overseeing the operation of terminal equipment, to server and network management outsourcing, including complex IT infrastructure and customer applications outsourcing with the possibility of assuming full responsibility for property and personnel. Operated services are managed and carried out in accordance with the ISO/IEC 20 000 standards, even in 24/7 mode.

Besides the outsourcing of specific technologies and services, AUTOCONT has its key competence in integrating customer's applications and participating in their IT development planning.

BUSINESS APPLICATIONS

AUTOCONT has a very broad portfolio of applications. It includes enterprise information systems for running small and big companies, customer relationship management, including sales, marketing, project and service support, and systems for HR management. It is supplemented by data warehouses, Business Intelligence, digitization, document administration and management, web and portal solutions, e-commerce and digital strategy. The practical experience obtained from many projects has allowed us to create a broad spectrum of industry solutions. The goal of the customer is always the same - to achieve greater efficiency, cost savings and higher revenue through process automation. The task of AUTOCONT is to develop an optimal way and means for doing this, and together with the customer bring the proposed solutions to life.

www.autocont.sk

CLOUD SERVICES

For a rapidly growing cloud area, AUTOCONT offers solutions and services based on the use of public, private, or hybrid cloud. It provides cloud services in its own data centres located both in the Czech Republic and abroad. AUTOCONT provides cloud services in infrastructure, BI and data warehouses, IT security and databases. It offers cloud consultancy, designs and implements migration scenarios and cloud operation.

IT ARCHITECTURE AND STRATEGY

In business consulting projects, AUTOCONT profits from its expertise, long-term experience, applied processes in enterprise architecture in real environment, process analyses, and process management. AUTOCONT offers services related to strategy, ICT development and management, as well as ICT security consulting. It offers trainings and certification exams in ICT and strategy. AUTOCONT provides integration services in a form of a consultation, project or service contract, always in a way that is optimal for client's needs.
